Portfolio: https://felista-gor.vercel.app/ | **GitHub:** github.com/fellygor

PROFESSIONAL SUMMARY

Software Developer with over two years of experience developing web applications and business solutions within banking and financial services. Experienced in JavaScript, React, Angular, SQL, REST API integration, and workflow automation using Microsoft Power Platform. Proven ability to collaborate with cross-functional teams, translate business requirements into scalable software solutions, debug production issues, and support the full software development lifecycle in Agile environments. Passionate about full-stack software development and eager to expand expertise in Node.js while contributing to digital platforms that improve service delivery and community impact.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+)
 - **Frontend Development:** React, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, Angular
 - **Backend & APIs:** REST API Integration & Consumption, JSON, NodeJs, OOP Fundamentals
 - **Databases:** SQL Server, MySQL, Firebase Firestore
 - **Data & Automation:** Microsoft Power Automate, SharePoint, Power Platform, Power BI, Excel
 - **Tools:** GitLab, Git, GitHub, Postman, VS Code, Figma,
-

PROFESSIONAL EXPERIENCE

SpaceYaTech | Aug 2025 – Dec 2025

Frontend Developer Intern

- Developed modular React and TypeScript UI components for the EduPay platform, ensuring adherence to design systems and component reusability.
- Integrated RESTful backend APIs using custom React hooks and asynchronous fetching patterns, validating API payloads and handling error states.
- Designed dynamic data views, dynamic tables, and custom input forms to streamline administrative workflow tracking.
- Used Git for collaborative development, managing code updates through feature branching, clean commit messages, and code reviews.

Stanbic Bank Kenya | April 2023 – March 2025

Graduate Learner – Reconciliation & IT Automation | Oct 2024 – March 2025

- Built and configured Power Automate workflows and service integrations that streamlined SLA tracking, automated cross-system notifications, and cut manual follow-ups by 10%.
- Executed high-volume automated and manual reconciliation processes across core banking suspense accounts, enforcing 100% data integrity, audit compliance, and error-free operational ledger feeds.
- Investigated, logged, and resolved complex, high-volume production support incidents within strict SLAs while managing communications across cross-functional engineering and operational teams.
- Designed Power BI operational dashboards to monitor service metrics, incident trends, and data pipeline efficiency.

Graduate Trainee | April 2023 – Sept 2024

- Developed and enhanced an internal Progressive Web Application (PWA) using Angular and Angular Material,

consuming RESTful services to boost user engagement by 30%.

- Conducted requirements discovery sessions with cross-functional stakeholders to align core financial workflows with secure system behavior and high data quality standards.
- Designed and deployed Power BI tracking dashboards for core operations, directly aggregating multi-source transaction data to support executive decision-making.
- Worked closely with business analysts, UI/UX, and technical leads in an Agile environment to translate business logic into scalable, maintainable software components.

Sify Technologies | Sept 2022 – Mar 2023

Technical Content Writer

- Authored 10+ in-depth technical articles on AI, Cloud Computing, and emerging technologies (Robotics, IoT) to drive corporate innovation agendas.
- Enhanced brand authority by presenting on multiple technology podcasts, refining communication skills essential for distributed, cross-functional teams

Kenya Pipeline Company | Feb 2021 – May 2021

IT Support Intern

- Resolved 98% of technical incidents within SLA guidelines while providing first-line technical support to 20+ daily internal users
- Provided first-level technical support to over 20 internal users daily by diagnosing and resolving hardware, software, network, and system issues.
- Escalated complex technical issues to senior engineers and followed up to ensure timely resolution.

EDUCATION

- **BSc. Computer Science**, Catholic University of Eastern Africa
Relevant Coursework: Object-Oriented Programming (OOP), Data Structures & Algorithms, Relational Database Management (SQL), Software Engineering, and Web Development.

PROJECTS

TaskFlow App | React, Firebase, Context API, TailwindCSS

GitHub: <https://github.com/fellygor/Taskflow> | Live Demo: <https://taskflow-nu-nine.vercel.app/>

- Built a task management application with Firebase authentication and protected routes
- Implemented real-time CRUD functionality with optimistic UI updates
- Developed reusable React functional components using hooks and implemented global state management.
- Added persistent dark mode and responsive layouts for improved user experience

Book Haven | React, TailwindCSS, Google Books API

GitHub: <https://github.com/fellygor/Book-Haven> | Live Demo: <https://book-haven-sigma.vercel.app/>

- Connected the app to the Google Books REST API to pull, search, and display dynamic book data.
- Wrote clean async logic to handle loading spinners, empty states, and API call errors.
- Optimized data fetching and UI rendering so large search results load quickly on both mobile and desktop.

CERTIFICATIONS

- Backbase Frontend Developer – Backbase
- Learning REST APIs - LinkedIn Learning
- Github Foundations – DataCamp
- Technical Support Fundamentals – Google | Coursera
